Leaf Remover EB 490 Professional

Options

■ Hydraulic Pre-cutter

Cuts canes and shoots immediately ahead of the leaf remover for the optimum leaf removal result.

■ Foliage sensing

The foliage sensing system allows the leaf remover head to 'float' to maintain an even pressure on the canopy even in sloping or undulating terrains.

■ VITcontour

On XHD models we offer an optional hydraulic foliage sensing system which allows the operator to adjust the intensity to suit the travel speed.

■ Roll-over device

Allows the entire leaf remover head to pivot 180° to allow efficient leaf removal on a single side of the canopy only.

Details and illustrations should be considered to be approximations. The products illustrated sometimes include special equipment which is not part of the standard scope of supply. We reserve the right to make technical and design changes.

The Binger Seilzug Leaf Remover EB 490 P is the next generation of the world's most successful leaf remover.

The counter-rotating rollers gently pluck the leaves from the vines, providing effective and efficient leaf removal in all canopy styles. One of the rollers is deeply grooved for improved airflow is also equipped with a patented cleaning comb which prevent build-up on the rollers. The valuable grapes remain unharmed with this technology so the machine can be used at any time from flowering until harvest.

The roller mechanism is designed to provide maximum traction on leaf surface which ensures maximum leaf removal is possible, even in wet canopies. The overall construction is robust, providing longevity and reliability.

We offer a wide range of models to suit every vineyard depending on the scale or terrain.

- **EB 490 Professional HD Single In Row**
- **EB 490 Professional XHD Single In Row**
- **EB 490 Professional HDC Double In Row**
- **EB 490 Professional XHD Double In Row**
- **EB 490 Professional Overrow**

- The high-performance suction fan in combination with the optimised leaf remover unit provides 'best of class' leaf removal result even at higher travel speeds.
- Cleaning is simple and easy, required little time and effort.
- Robust steel fan impellor does not wear and is impervious to foreign objects.
- Debris and leaf matter is expelled through a forward facing vent to eliminate contamination being directed onto the tractor.
- The grooved plastic roller prevents shoot damage, even when used immediately after flowering.
- Multiple hydraulic adjustments allow the machine to be customised to your vines.
- Greasable bearings for long life and low maintenance.
